

COVID-19 information

There are currently no restrictions regarding the COVID-19 infection in place in the Czech Republic.

We are aware of the need to have recent test for SARS-CoV-2 infection before flying back home for some of you. At the moment, there is a testing centre located at a shopping mall just next to the conference building (see figure below).

At the time of the conference, an updated information on the nearest testing centre will be available from the organizing company Congress Prague. You will find their desk outside the conference room. They will be able to navigate you to the place where you can get tested.
